

To whom it may concern:

ABB was the main Contractor for delivering two (2) ABB Network Manager Advanced Distribution Management Systems that have been executed and accepted by Ameren. Both of those systems are currently in operation and have been since 2015. One system covers Ameren Missouri and the other covers Ameren Illinois

The delivered scope included design, engineering, procurement, fabrication, software, documentation, integration, hardware, training, shipping, site installation and start-up services.

The referenced scope included the following functionality:

Missouri System

- Network Manager SCADA Applications.
- Network Manager OMS Applications.
- Network Manager DMS Applications.
- Number of Meters: ~ 1.2 M

Versions

- SCADA Network Manager version 5.5
- DMS/OMS Network Manager version 7.1

Illinois System

- Network Manager SCADA Applications.
- Network Manager OMS Applications.
- Network Manager DMS Applications.
- Number of Meters: ~ 1.2 M

Versions

- SCADA Network Manager version 5.5
- DMS/OMS Network Manager version 7.1

All work was performed in a professional manner by ABB.

SCADA/DMS/OMS Upgrade is in progress.

Sincerely, 

Rodger Koester
Manager, Distribution Operations
